About Me

- PhD in Political Science from NYU

About Me

- PhD in Political Science from NYU
- 4 semesters TA'ing in NYU's Masters in Data Science; 3 of those Intro to DS

About Me

- PhD in Political Science from NYU
- 4 semesters TA'ing in NYU's Masters in Data Science; 3 of those Intro to DS
- Starting as Assistant Professor of Political Science at Penn State in the Fall

  - Social Media
  - Text as Data
  - Online harassment/hate speech

About Me

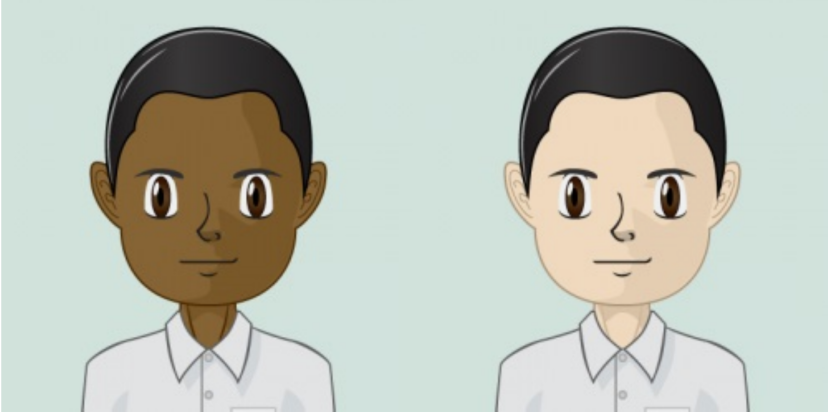
- PhD in Political Science from NYU
- 4 semesters TA'ing in NYU's Masters in Data Science; 3 of those Intro to DS
- Starting as Assistant Professor of Political Science at Penn State in the Fall
- Research interests
  - Social Media
  - Text as Data
  - Online harassment/hate speech
  - Political polarization

My Research

- Sample of white men (or fully anonymous users) harassing others using racial slur

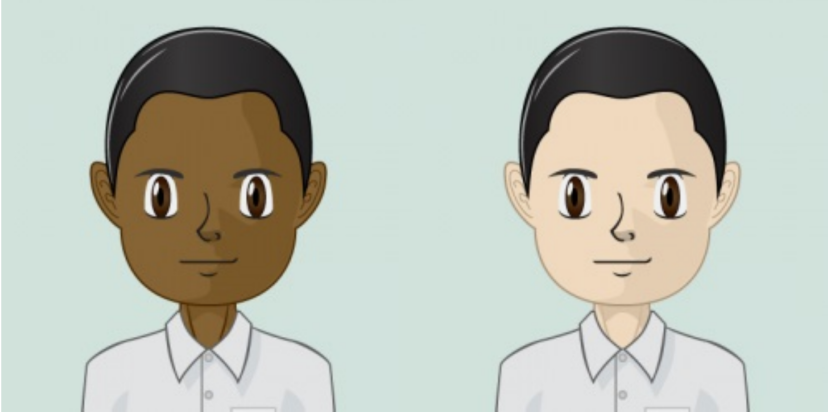
My Research

- Sample of white men (or fully anonymous users) harassing others using racial slur



My Research

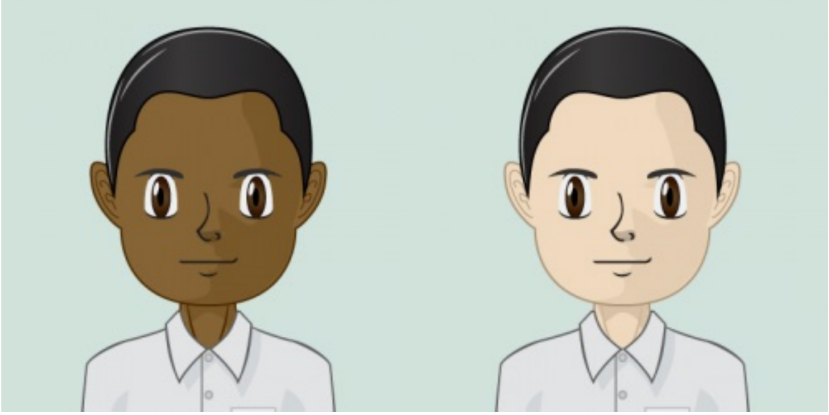
- Sample of white men (or fully anonymous users) harassing others using racial slur



- "[@subject] Hey man, just remember that there are real people whose feelings are hurt when you use that kind of language"

My Research

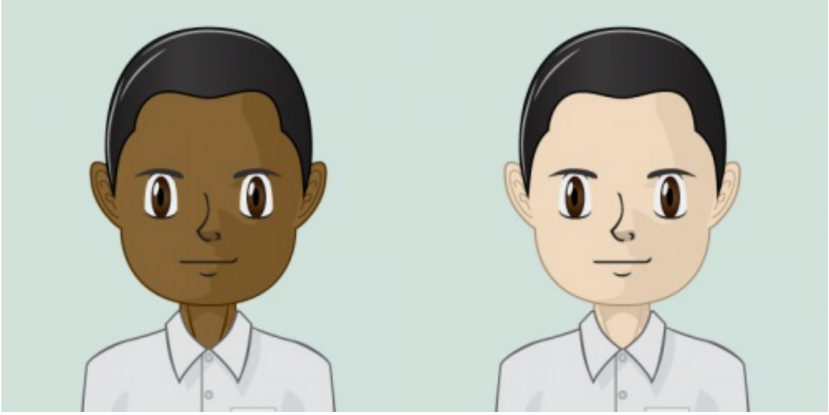
- Sample of white men (or fully anonymous users) harassing others using racial slur



- "[@subject] Hey man, just remember that there are real people whose feelings are hurt when you use that kind of language"
- White, high-status bot (sock puppet) caused subjects to tweet fewer racial slurs

My Research

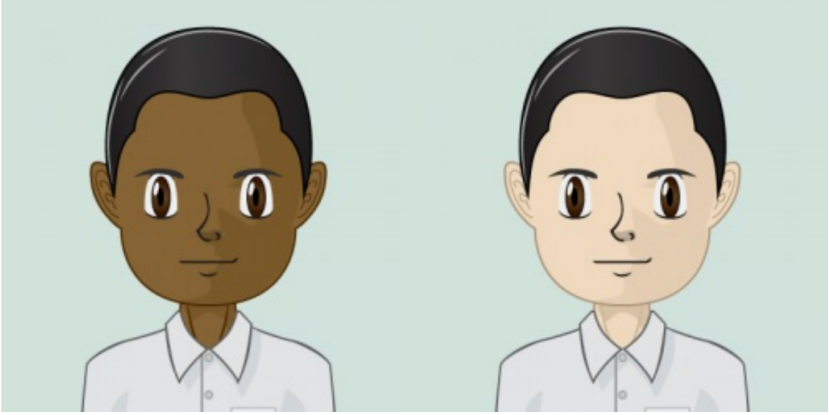
- Sample of white men (or fully anonymous users) harassing others using racial slur



- "[@subject] Hey man, just remember that there are real people whose feelings are hurt when you use that kind of language"
- White, high-status bot (sock puppet) caused subjects to tweet fewer racial slurs
- Reactance: black, low-status bot caused subjects to tweet *more* racial slurs

My Research

- Sample of white men (or fully anonymous users) harassing others using racial slur



- "[@subject] Hey man, just remember that there are real people whose feelings are hurt when you use that kind of language"
- White, high-status bot (sock puppet) caused subjects to tweet fewer racial slurs
- Reactance: black, low-status bot caused subjects to tweet *more* racial slurs
- Social identity and status affect the enforcement of behavioral norms

My Research

- 2014 Protests in Venezuela
  - We analyze elite Twitter use

My Research

- 2014 Protests in Venezuela
  - We analyze elite Twitter use
  - Regime and opposition elites are quantitatively similar prior

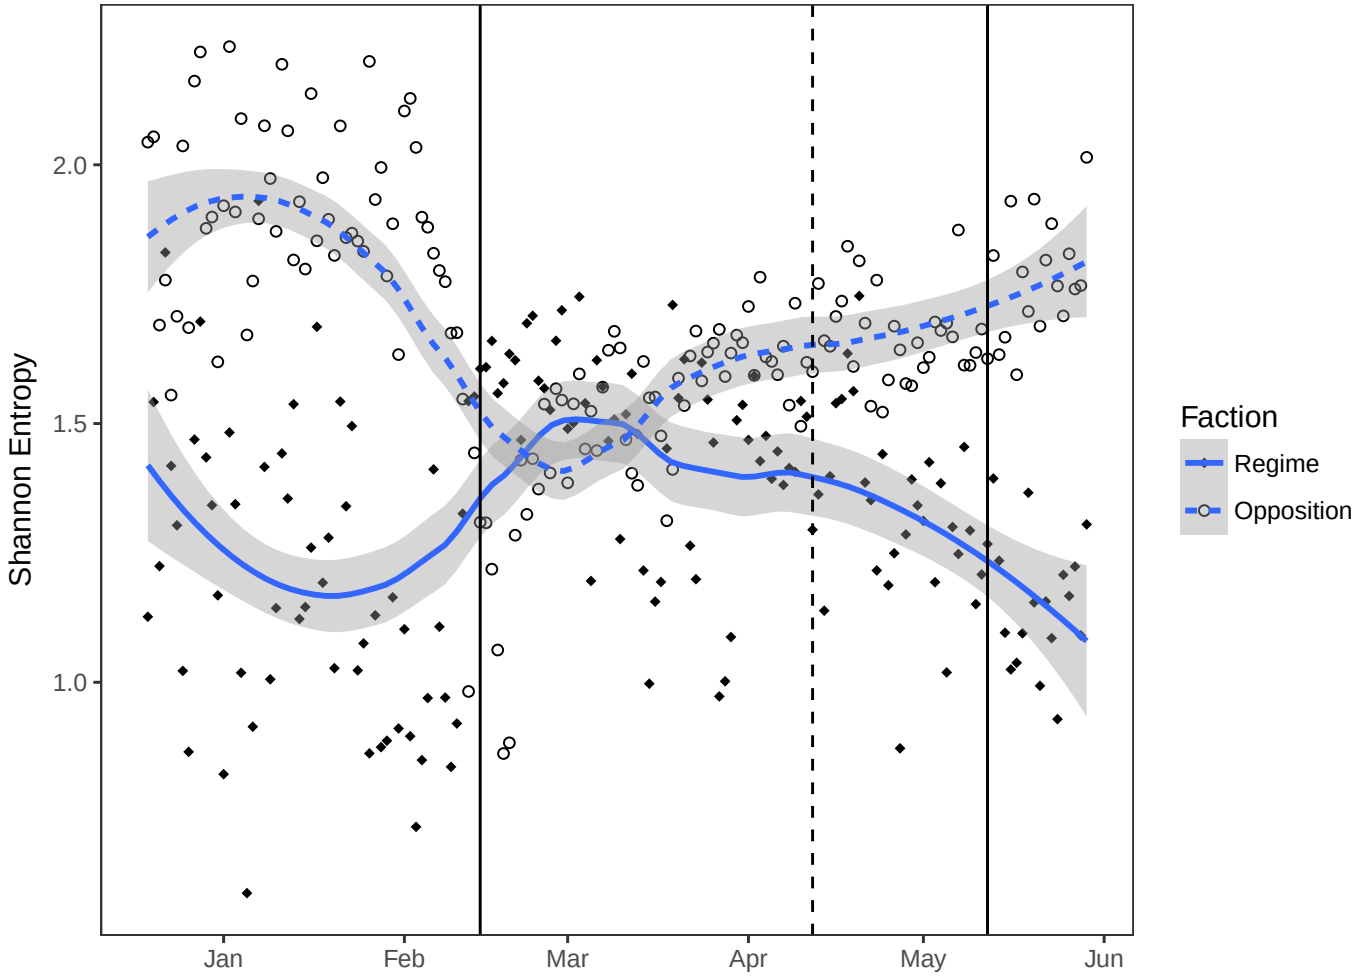
My Research

- 2014 Protests in Venezuela
  - We analyze elite Twitter use
  - Regime and opposition elites are quantitatively similar prior
  - The opposition elites keep talking about the protests, while the regime tries to advance various other narratives, to distract from the protests

My Research

- 2014 Protests in Venezuela
  - We analyze elite Twitter use
  - Regime and opposition elites are quantitatively similar prior
  - The opposition elites keep talking about the protests, while the regime tries to advance various other narratives, to distract from the protests

My Research



Each point represents the Topic Diversity score for the opposition and regime tweets respectively, compuated based on their tweets. The vertical lines correspond to the murder of Miss Venezuela, the arrest of López, and Beginning of the Independence Movement Day, respectively.
